

October 13, 2025: On Donald Trump Was the End of America

Our country hung at the precipice of failure when the American people rallied around Donald Trump's promises to restore what was right and good about the vision for America.

Since his second term has begun, there has been nothing but ongoing corruption and personal financial gain for Donald Trump at the expense of everyone around him - except the USA military which is primarily responsible for holding him in power.

I am clearly distinguishing that the USA military is not coming to 'save America' from the political crisis that exists today - because ***the USA military is the cause of the ongoing political crisis that is destroying the entire country.***

Is it America's fate to decline and fall?

The antichrist has long haunted politics. Now it's rearing its head again...

The American military is the problem and not the solution. Donald Trump is the face of the problem and not the face of the solution. The USA military is the body of the problem and not the body of the solution.

I am happy to see that the government is shut down and I do hope that the shut down remains in place to become the longest shut down in American history.

As that goal is reached, I hope that the cities and states begin the process of peacefully forming regional governments that slowly extract their independence from the federal government.

The appropriate end will arrive once America stays closed down due to its own lack of funding and its inability to pay for its own military operations and banking obligations at the same time.

During that period, the newly formed regional governments, funded by their state and local partners, will once again firmly hold the legal powers that the United States military unlawfully stole from the United States citizens.

I do not see a future where the United States survives under the existing methods of power that are being exerted over us at this time.

I am seeing that the USA military is intending to break down the rule of law so that it is the only power left against gangs of militants and terrorists - exactly as we see in Israel and Palestine at this very moment.

I am keenly aware that **the United States military** is not simply partnering with the Israeli government, but it **is actually re-creating the Middle East's way of life here in America in 2025.**

The state and local governments absolutely must rise up from below to create newly formed stability regions to prevent this corrosion from continuing to degrade into a violent failure.
